MORNING GLORY AND BIG FOUR COMPANIES GRANT TWO LEASES

Special to the Bonanza

MANHATTAN, Sept. 30.—Two leases which are to be operated on a gold scale and which should figure extensively in the activities of Manhattan have been let by the Big Four and Morning Glory companies to N. P. Nelson, a prominent operator and miner of the camp. The Big Four leases are of blocks 9 and 19, or 200 feet of the Big Four, between the company shaft and the Tarash lease, the blocks extending the full width of the claim. The Morning Glory lease covers the east half of the Pine Nut claim.

The Big Four and Morning Glory companies are closely allied. They are composed of practically the same persons, L. K. Kootz at the head. Mr. Nelson has strong backing, composed of Goldfield mining men of prominence and with capital to carry on operations on a respectable scale. Their names are withheld, as they are silent partners.

The Big Four lease is 150 feet from the shaft where the company

is carrying on its big operations. It might take in a portion of the big ledge into which the glory hole has gouged, but the leasers will confine their operations at present to another ledge, some three or four feet wide, which in the past few days has assayed in the hundreds. It contains quartz and spar, the former being absent in the Big Four ledge proper. A shaft is down to quite a depth on this ledge and its appearance uniformly is encouraging.

The Morning Glory lease is that portion lying next to the White Caps where company work, in the form of prospecting, was prosecuted throughout the summer. A 75-foot shaft with drifts reveals low-grade ore. Mr. Nelson operated there in the company's employ. While nothing of commercial value was struck he says the finding of it is a matter of course. When it is struck it will take second place only to the White Caps according to his idea, and it will be an extension of the White Caps ledge.

TAKES AN AUTO TRIP BUT R'NS SHY OF PETROL

JAKE GOODFRIEND EXPERIMENTS AND IS FORCED TO WALK ACROSS DESERT

Jake Goodfriend of the Butler theater, Tonopah, and the Exchange theater, Goldfield, is now regarded as one of the most competent automobile experts in the southern country. Ever since he owned a machine Jake has experimented regarding endurance tests with a small supply of gasoline. Frequently he has endeavored to travel a long distance across the

desert using only a small amount of the petrol. Upon all such occasions he has scored a failure, but he continues in his experiments and expects to make a success some day. The latest adventure of Jake is recounted in the Goldfield Tribune of yesterday. It follows:

Jake Goodfriend is powerful carefree about his petrol. Jake is some mining man. They say around the theater that a prospector can hypnotize Jake by petting one of his menagerie of trick dogs. Be that here or there, Jake is careless about his petrol. Jake is deeply, sentimentally, monetarily, financially and inalienably tied and addicted to the mining game.

Jake, with his suite of dogs, started for the Montezuma neighborhood the other day, accompanied by some friends whose duties consisted in keeping the dogs within the tonneau. After a successful trip of several furlongs and just at the middle of nowhere it was discovered that Jake had carefully set his gauge before

he started and then had three-fifths of a quart. Did he get back? Ask him.

ADVERTISED LETTERS

List of advertised letters remaining in the Tonopah postoffice for week ending Sept. 28, 1912.

When calling for these letters please state that they are advertised. A fee of one cent will be charged on each of the following:

Allen, Jack; Bieham, Nick; Brown, Mrs. Geo.; Baker, Chas. W.; Browne, Mrs. Mary; Carter, Bob (2); Easton, Andrew; Fitzgerald, Bob; Grizzle, A. W.; Jones, Dave; Lacey, Albert; Luckins, Miss J.; Miller, E. C.; Mills, Mrs. Ida; Montaga, J. N.; Mitchell, John; Milacich, Radovan; Polkinghorn, Miss Mary; Rielly, E.; Warren, Chris; Withers, Willie H.; Williams, Marie.

REMINGTON-UMC

AUTOLOADING SHOTGUN

For singles—trap or field—just toss in a shell, press the button and—"PULL." The side bolt makes it easy. You don't have to tug at the barrel or watch an on-and-off device. The action stays open after each single shot is fired. It always stays open when the magazine is empty. Five shots—three to get the cripples—each under absolute control of the trigger finger. The recoil reloads for you—kicks another shell in; takes the strain off the gun—the discomfort out of the kick—all without diminishing the drive behind the shot. Simple take-down—a few turns of the readily handled magazine screw—cap makes cleaning, carrying and interchange of barrels quick and easy.

Send for a motion picture booklet telling how the kick is used—how a friction device found only on the Remington-UMC Autoloading Shotgun takes the punishment out of heavy loads.

Write to-day,
